

Chem*Star Formulations Presents:

Osteoarthritis, Joint Pain and Nutrition

Jason Theodosakas, M.D. wrote a book entitled, The Arthritis Cure, in which he outlined the scientific research from around the world that indicated that supplements of glucosamine and chondroitin have beneficial effects on osteoarthritis. Dr. Theodosakas pointed out that articular cartilage on the ends of our joints is like a rubber eraser on end of a pencil. With continued use and wear and tear, it becomes worn down. The good news is that supplementing with glucosamine and chondroitin can FEED the joints, prevent and reverse this wear and tear situation.

In addition to the glucosamine and chondroitin in our Pro-Flex™ formula, we have added natural anti-inflammatory agents and minerals that help to nourish our joints.

Bromelain is an enzyme from pineapple that acts like a natural anti-inflammatory agent and Boswellia is a plant extract used in India for thousands of years for arthritis and inflammation. Boswellia's more familiar name is Frankensence (one of the gifts of the Magi) and has been used in aruvedic medicine for inflammation for centuries. We also include the trace minerals, boron and manganese, which have been show effective in nourishing the joints.

In addition, our CRP Formula and CBF Formula contain natural anti-inflammatory agents that have been shown to reduce joint inflammation.

Our Sports Formula Cream is a very effective topical analgesic that most people feel provides pain relief for their joints within an hour's time.

To try any of our formulas or find out more information, call or go online with the information below:

Our Sport Formulas Family of Nutritional Support Have been shown to reduce inflammation and help support healthy joints.
